

SHAKE BEFORE USE

BLOOD-LESS SPRAY

An all natural spray-on product for use on
surgical dehorning and castration wounds

Dehorning Wounds- Castration Wounds

1 Litre

USAGE AND APPLICATION INSTRUCTIONS

Shake the product before use.

Apply GRO Blood-Less Spray immediately after completing the surgical procedure.

GRO Blood-Less Spray should be applied to cover each wound and at least a 10 to 15mm radius around the wound edge. This ensures the greatest level of coverage of blood vessels and exposed tissue is achieved. If full coverage is not achieved with the prescribed dose, apply additional product. The spray band width can be adjusted with the applicator nozzle.

Do not touch the wound with the applicator or your hands during the process.

GRO Blood-Less Spray is an oil based formulation and will stick well to the wound along with some migration around the wound area.

PRODUCT STORAGE

DO NOT REFRIGERATE. Store any unused product in a cool, dry, dark location in the original container. Avoid contamination of the product with any substances including dirt, water or other contaminants. Do not mix old batches of product with new product.

Do not combine the product with any other. Store below 30 degrees celsius.

GRO BLOOD-LESS SPRAY DOSAGE CHART

Species	Operation	Body weight	Number of Sprays	Dose per wound	Total Dose per animal	Doses per litre
Cattle	De-horning	upto 100kg	2 per horn	3ml	6ml	167
		>100kg	3 per horn	4.5ml	9ml	111
	Surgical Castration	upto 100kg	3	4.5ml	4.5ml	222
		>100kg	4	6ml	6ml	167

*Wound size varies, thoroughly cover the wound and surrounding area.

Each full trigger spray will apply 1.5ml of product to the wound area.

For best results it is recommended to use this product concurrently with a registered injectable pain relief product.

ADDITIONAL INFORMATION

GRO Blood-Less Spray is formulated to assist with the reduction of bleeding of surgical wounds created during the dehorning and castration processes in cattle. When used as directed, GRO Blood-Less Spray may assist with the reduction of arterial, venous and capillary bleeding, which are believed to adversely impact animal recovery and productivity. GRO Blood-Less Spray is recommended to be used concurrently with injectable pain relief products, hence providing a broad spectrum welfare approach to these livestock husbandry practices. GRO Blood-Less Spray is formulated from a proprietary blend of natural oils derived from plants. The ingredients in

GRO Blood-Less Spray have been used effectively in conventional and traditional medicine.

Each ingredient has been proven in clinical trials, and/or by traditional means to provide one or more of the following benefits:

Reduced Bleeding - Insect Repellent - Antiseptic

This product is an allowed input certified to the Australian Certified Organic Standard
