

SHAKE BEFORE USE

WOUND

RELIEF & WELFARE

with eugenol

An all natural broad spectrum welfare
product for use in sheep and cattle

Dehorning-Castration-Mulesing-Branding - Accidental Wounds

1 Litre

USAGE AND APPLICATION INSTRUCTIONS

Shake the product before use

Apply GRO Wound Relief and Welfare immediately after completing the surgical procedure.

Apply GRO Wound Relief and Welfare to cover each wound and at least a 10 to 15mm radius around the wound edge. This ensures that exposed nerve endings, tissue and blood vessels are covered, providing maximum relief and protection. If full coverage is not achieved with the prescribed dose, apply additional product. The spray band width can be adjusted with the applicator nozzle.

Do not touch the wound with the applicator or your hands during the process. GRO Wound Relief and Welfare is an oil based formulation and will stick well to the wound along with some migration around the wound area.

ACCIDENTAL WOUNDS

Accidental wounds are infinitely variable. This product should not be used to replace the advice of a Veterinarian. Where veterinary advice is not deemed necessary, applying GRO Wound Relief and Welfare to the wound may provide relief and assist with wound recovery. If in doubt, contact your Veterinarian.

PRODUCT STORAGE

DO NOT REFRIGERATE. Store any unused product in a cool, dry, dark location in the original container. Avoid contamination of the product with any substances including dirt, water or other contaminants. Do not mix old batches of product with new product. Do not combine the product with any other. Store below 30 degrees celsius.
